Caseware Cloud

World-class compliance and streamlined automation, from any location, on any device, at any time.

Caseware Cloud takes any project into the future by empowering teams to collaborate in real-time within a centralised platform. Organizations gain unprecedented productivity and unmatched visibility into every project, with innovative web-based tools and an intuitive management interface for managing all files, information and collateral. Easy file sharing and communication with stakeholders outside your organisation e.g. Auditor General, can now be done securely in a structured manner. Managers can easily gain insights into who is working on what, track the progress of any project and keep a constant eye on quality.

Key Features

User Collaboration
Enable staff to collaborate in real-time on the same engagement and facilitate review and sign-offs from anywhere.

Data Management
Manage a single copy of all documents, files and client information in one platform with redundant backup and retention.

Organisation Management
Gain real-time insight on clients, staff and engagements for proactive decision making to drive profitability.

Client Collaboration
Facilitate collaboration with clients through easy file sharing, communication and status reporting.

Engagement Management
Monitor and track the progress and statuses of all engagements in one central location on any device at any time.

Strong Permission Protocols
Leverage built-in roles for easy rights and access management or create permissions based on specific engagement needs.

Automatic Time-Tracking
Track and report actual time spent in engagements to reduce administration overhead and accurately gauge staff efficiency.

Industry Standard Security
Utilise world-class security standards with built-in compliance support for ISO 27001:2013 and SOC 2, Type 1 & 2..
