

FR Financial Statements

The leader in the automation of IFRS-compliant Annual and Interim financial statements.

Caseware Working Papers is the ultimate end-to-end solution for auditors and accountants. The financial statement software handles the entire engagement from start to finish, in one integrated system. It covers everything from the write-up or acquisition of the trial balance to the final financial statements, and any required working papers and audit programmes in between.

Trusted compliance

Caseware ensures compliance with International Standards on Auditing, IFRS and IFRS for SME. Our expert content partners keep you updated with the latest disclosure changes.

Improved efficiencies and profitability

Draft and compile your financial statements faster than ever before. Greater efficiency leads to increased profitability and a quicker return on investment.

Reduced risk and greater control

Gives you greater control by allowing you to have visibility of an audit trail as well as version control. Caseware also has a built-in validation process that reduces the risk of inaccuracies.

Save time on every engagement

Anything that can be automated, has been automated, so you spend less time recapturing information.
